DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it is unsigned. It is noted that applicants' letter of 15 February 2002 indicated that a copy of the signed declaration was attached thereto, however, said copy is not present in the application papers at this time. It is requested that applicants submit a signed declaration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the metes and bounds of "an effective amount" are unclear as no goal or purpose for determining what amounts may constitute "an effective amount" are provided. If claim 1 were amended to delete the word "effective" or to define a goal by which to determine what amount is effective, this rejection would be withdrawn.

Claim 22 depends from itself. It appears that claim 22 should depend from claim 21.

Allowable Subject Matter

Claims 1-32 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The closest prior art reference is USP 5,637,351 to O'Neal which discloses addition of alkylnitrite radical to a process gas during CVD. There is no disclosure or fair suggestion to add the claimed nitroxyl radicals of the formula in applicant's claim 1 to a process gas in a CVD process.
